

UKG for Manufacturing

Workforce management solution that drives productivity

Preparing for the Future of Manufacturing

In an age of rapid innovation, manufacturers know that to remain competitive, they must implement digital transformation strategies that support their processes and their people. Access to real-time information can help achieve operational agility, workforce performance improvements, cost reductions, and enable manufacturers to deliver a better overall employee experience.

At UKG™ (Ultimate Kronos Group), our purpose is people™. Our solutions provide robust automation and easy-to-use tools that deliver the mobility, self-service, and flexibility in today's workforce demands.

Nine out of the top 10 manufacturers on the Fortune 500 list rely on UKG solutions to manage their people and drive results.

Workforce Solution Built for Manufacturing

UKG for Manufacturing provides the right workforce management solutions to help your business thrive.

Modern Workforce Management

Manage your people more effectively with AI-powered solutions built on an intelligent cloud platform. UKG's modern workforce management suite streamlines complex processes, simplifies compliance, and delivers operational insights to balance the needs of your people with business objectives. Our solution help your workforce stay productive and connected — from any device, anywhere — enabling them to make better decisions more quickly. With UKG, you can:

- **Automate time, attendance, leave, and accruals**
- **Intelligently schedule to meet fluctuating production demands**
- **Empower employees with self-service tools**
- **Get AI-driven business recommendations**

Strategic Workforce Planning

UKG Pro® Strategic Workforce Planning gives you a longer-term view into your future staffing and business needs so you can prepare for any scenario and take a more strategic approach to your people strategy. It is now easy to accurately plan for the future of your workforce. With UKG, you can:

- **Simplify workload budgeting to improve efficiency**
- **Enhance visibility and gain insights by viewing all labour analytics in real-time**
- **Build powerful defense for operational realities with easy-to-use modeling and what-if scenarios**
- **Capacity planning to nurture and grow your most important asset – your people**

Seamless HR service delivery

Provide your workforce with a personalized workplace experience — whether they're on the shop floor or in the back office or working remotely — while improving HR's agility and impact. UKG solutions deliver a better way to support employees' requests and important life-work moments through HR digitization, process automation, and service-level insights that enhance HR productivity and the employee experience. With UKG, you can:

- **Give employees access to personalized HR information**
- **Manage employee documents efficiently and compliantly**
- **Configure intuitive dashboards to track key metrics**
- **Capture people's sentiments with AI-powered surveys**

Real-time insights into productivity

UKG solutions provide you with the real-time visibility needed to track how your operations perform against productivity goals and benchmarks, enabling you to better manage operations while controlling labor costs. These insights help maximize profitability by ensuring accurate labor standards and costing and help optimize labor and workforce strategies by tracking skills, productivity, and performance insights — supporting better business outcomes overall. With UKG, you can:

- **Drive operational efficiencies with real-time visibility into labor data**
- **Gain control over operational costs and protect your bottom line**
- **Measure actual labor productivity to achieve 100% reconciliation of paid time with labor**
- **Provide a consistent and simplified user experience regardless of device**

Workforce management for all- Office Employees; Frontline & Field Workforce; Contract & Gig Workers

Be ready for success with solutions built for you. Drive productivity improvements and enable on-time delivery of high-quality goods and services — leading to better business outcomes.
